→ [Phylogeny and evolution of the Mollusca](#)

Material description:1 vol. (XI-469 p.)

Note:Note : Notes bibliogr.

Abstract:"The Mollusca are the second largest animal phylum and boast a fossil record of over 540 million years. They exhibit remarkable anatomical diversity and include the bivalves (scallops, oysters, and clams), gastropods (limpets, snails, and slugs), and cephalopods (squid, cuttlefish, and octopus). This study treats each major taxon and supplies general information as well as overviews of evolution and phylogeny using data from different sources - morphological, ultrastructural, molecular, developmental, and from the fossil record."--pub. desc

Edition:Berkeley (Calif.) : University of California press , cop. 2008

Éditeur scientifique:David R. Lindberg, Winston F. Ponder
